Directions

1. Fill the cavities of your mold with Himalayan Pink Salt. You'll have a little more than you need. Let the extra pile up over the top.
2. Melt the Mango Butter, Cocoa Butter, and Jojoba in a double boiler over high heat.
3. Once you are sure that all of the ingredients are completely melted, remove the boiler from the heat, and allow it to cool for thirty seconds, stirring continuously.
4. Add the Rose Oil, and stir well.
5. Carefully pour the melted mixture into each cavity of your mold. If you have extra, reserve it. You can reheat it, gently, for a second batch.
6. Allow the melts to cool and harden completely before attempting to remove them from the mold. 15 minutes in the refrigerator or freezer should do the trick.

Usage & Packaging

These melts are very soft, so it's important to store them in a cool, dry place. During the summer, these melts might need to be reinforced with extra Jojoba. Keep them in an oil proof package. Our Acetate Soap Boxes are perfect! To use, add one melt to warm bath water.
