

# Cocoa Hazelnut Whipped Lip Butter

a light and fluffy lip balm

## Ingredients

- 60 grams Cocoa Butter
- 45 grams Hazelnut Oil
- 10 grams Beeswax
- 5 - 10 grams Brown Jojoba Wax Beads (optional)
- 2.5 ml (1/2 teaspoon) Organic Vanilla CO2 Extract (optional)

This recipe makes about nine ounces.

## Directions:

1. Combine the Cocoa Butter, Beeswax, and Jojoba Wax Beads in a double boiler and heat until fully melted.
2. Remove the product from heat, then add the Hazelnut Oil. Stir well, then add the Vanilla CO2 Extract.
3. Whip the mixture using an electric hand-mixer for 3-5 minutes. Stop and scrape the sides, then continue to mix until the product cools, lightens in color, and forms stiff peaks. This may take anywhere from ten to fifteen minutes or longer.

Tip: The last step can be sped up by sitting the mixing container in a tub of ice water. Just keep in mind that you will have to move very quickly as the butter will harden much faster. Try alternating whipping the mixture in and out of the ice bath as it cools to slow things down.

## Usage & Packaging:

- The whipped mixture can be scooped into jars or piped into jars using a pastry bag and tip. These lip butters look great in our 1 ounce Clear Dome Jars or our 1 ounce PET Jars.
- Apply the lip butter directly to your lips whenever they are feeling dry. Keep in mind that this butter is softer than most other lip balms and will melt easily in hot weather.
- The butter should last three to six months as is but its stability can be reinforced by the addition of an antioxidant, such as Vitamin E T50 or Rosemary Oil Extract.
